Net-Billing & Net-Metering  
*(Feed-in)*

# webill

READ • RATE • RECOVER

- 5 years in development.
- Global patent pending.
- Massive private R&D investment.
- Single-phase and Three-phase smart meters at unbeatable prices.
- Support for prepaid, postpaid and time-of-use.
- 6 different Net-Billing strategies.
- Comprehensive accounting.
- Straight-through payment processing.
- Mobile Consumer application.

# Net-billing Smart Meters

100% South African Technology

SABS and ICASA approved

Bidirectional communication

Communication options: Sigfox, Nblot, SIM, LoRa, Ethernet, PSL or RFID

South African patent lodged and global patent pending

Half-hourly readings

Postpaid and Prepaid

Net-Metering grid and feed-in consumption  
Kilowatt hours and kVArh

Single-Phase

Three-Phase

# Administrative Software as a Service Backend

Only a few of the features and functionalities listed below:

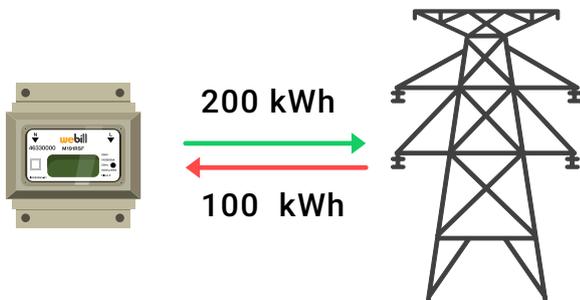

- Tariff creation and lookup.
- Straight-through invoicing and payouts.
- Real-time reports on Prepaid, Net-Billing consumption and Charges.
- Fraud detection.
- Fully fledged Accounting System.
- Seamless straight-through processing for payouts.
- Settlements once a day/week/month.

# Net-billing Strategies

## Consumption Set-off & Banking

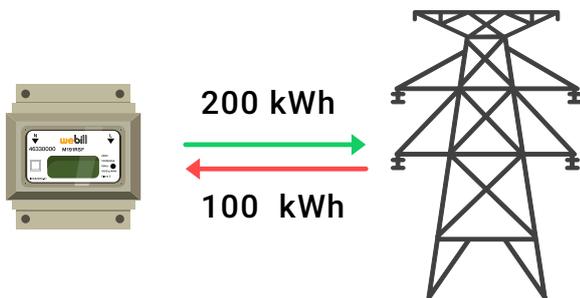

### Consumption Set-off: No Banking

**Consumption: 0 kWh**

In real-time what you put in and take out are offset against each other. Any excess feed-in is not banked.

### Consumption Set-off: Banking

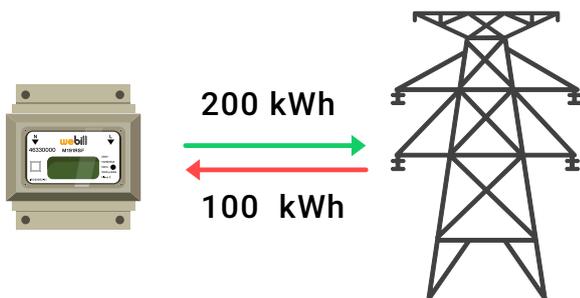

**Consumption: 0 kWh**

**Banked: 100 kWh**

In real-time what you put in and take out are offset against each other. Any excess feed-in is banked.

### Consumption Banking: No Set-off

**Consumption: 100 kWh**

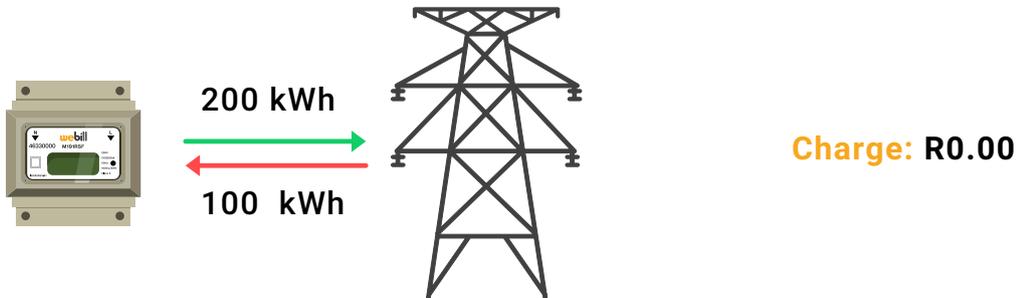

**Banked: 200 kWh**

What you put in and take out are not offset against each other. Feed-in is banked separately

# Net-billing Strategies

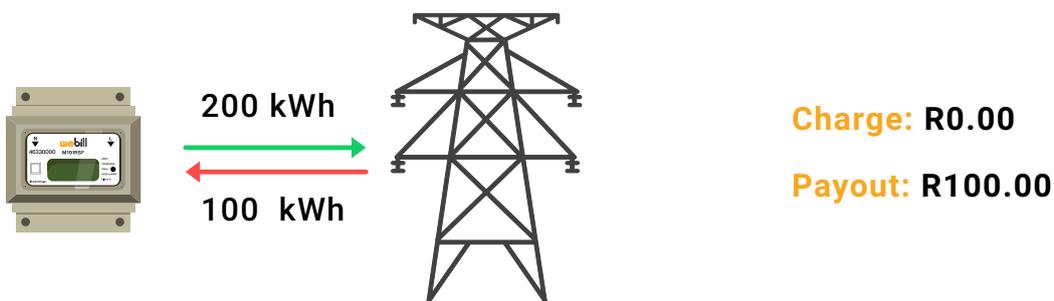

R1.00 per kWh (for illustration purposes only).

## Charge Set-off: No Banking

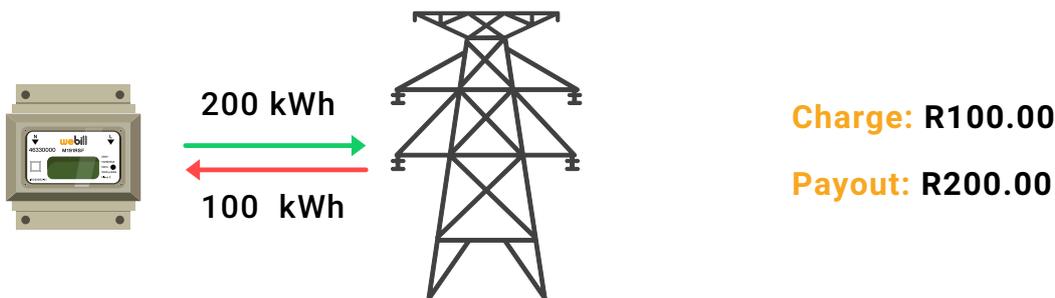

In real-time what you put in and take out are offset against each other. Any set-off charge is not banked.

## Charge Set-off: Banking

In real-time what you put in and take out are offset against each other. Any set-off charge is banked.

## Charge Banking: No Set-off

What you put in and take out are not offset against each other. Accrued charge is banked separately.

# Consumer Application

- Mobile application (Android, Apple and Huawei).
- Pay bills and top-up prepaid meters.
- Track real-time feed-in consumption and feed-in monetary credits.
- Redeem banked consumption and redeem banked feed-in amounts.
- Fault reporting.
- Alert and notification configurations.
