The prepaid **Solution** backyard rentals

Benefits

The Webill Smart water-monitoring device allows landlords and tenants to view and manage their water consumption, updated every 6 hours.

Regular and transparent billing reduces disputes over bills makes revenue collection easy and makes unexpected bills at the end of the month a thing of the past.

The device can be retrofitted to all approved domestic and bulk meters and eliminates the need for manual meter reading while ensuring that the consumption is billed on the correct tariff.

The device can detect and automatically notify you of any leaks or attempts to bypass the meter, saving you money and protecting your investment.

The device is battery-operated with an expected lifespan of over 6 years so it is unaffected by load shedding and uses the IOT network allowing it to communicate from almost anywhere.

If used in conjunction with the Webill electricity meter, power can be switched off if water consumption is not paid for.

Guaranteed *recoveries*.
