

WeBill Products

Core

The WeBill Core Module makes it easy to link with a variety of different organisation types, manage your subsidiaries, assign work to your contractors or receive instructions from your utility companies all in one place.

Setting up users, configuring security protocols and integrating with third-party solutions is a breeze with the WeBill Core Module.

In-depth real-time reporting of your financial transactions gives you unparalleled control over your Organisation on the WeBill system.

Device Manager

Acts as an inventory for all your Organisation's meters, data concentrators, custom interface units, modems, SIM cards, meter seals and all other utility devices.

Schedule meter reads with actionable alerts and warning triggers directly to agents in the field.

Import real-time and historical meter readings from any source and from anywhere. Do your meter reads in a manner that best works for your Organisation.

In-depth consumption data and statistics give you unparalleled insight into how your devices are working for you.

Tariff

An evolving global tariff registry. A team of data capturers continuously ensure that our tariff rates are always up-to-date. You never have to worry about charging consumers incorrectly.

All industry standard tariff types are supported. Unique support for generator tariffs, feed-in, net metering tariffs, banking and time-of-use prepaid. Build your own tariffs.

Keeping the rates for your tariffs up-to-date has also never been easier. Tariff schedules ensure that you never get stuck with expired rates while our data capturer system ensures that human error is eliminated.

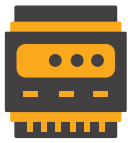

Portfolio

Whether you're a single property owner or a large municipality, no matter how many properties you have, we have the solution to manage all your utilities in one place. Configure, aggregate and subdivide the utility needs for all your properties.

Decision support insights, reports and dashboards into utility aspects of your portfolio – this includes comprehensive carbon emissions statutory compliance. Control your portfolio, consumers, tariffs, surcharges and schedules.

Instant, relevant, finely-grained, actionable, revenue balance data across all portfolios. What you pay for utilities is what you collect.

IoT Smart Devices

Reliable, cost-effective, smart and sophisticated IoT single-phase (Global patent pending), three-phase electricity and water meter monitoring.

The only IoT Time of Use prepaid Net-Metering, bidirectional electricity meter. Supported by Sigfox with LORA, MBIOT and other IoT networks to come.

Easy plug-and-play installation. The cheapest meter data communication costs on the market today, with the highest data frequency.

Seamless integration into the WeBill platform.

Simple integration into payment platforms.

All WeBill meters are certified by the standards authorities in the jurisdictions where the meters are sold.

Consumer

Empower your consumers to manage their home, business and holiday utilities all in one place. Your consumers can: pay and query their utility bills; purchase prepaid electricity, water or gas; receive real-time alerts on consumption balance and spending; report faults all in the palm of their hands.

Detailed real-time and historical utility transparency individually targeted for each consumer. Control how much utility information your consumers see and when they see it.

Eliminate the frustration of utility call centers with machine learning and artificial intelligence.

Field Manager

All utility assets are in the field, remote or built-up areas. You need to connect, disconnect, install, uninstall, audit, and read these assets. Some areas have no connectivity. You need to monitor your field Agents. Your field Agents need real-time feedback. Field actions need to be scheduled or on demand. Field Manager has you covered.

Field Manager connects with your consumers and the field Agents connect with the head office and their consumers. Integrates seamlessly with the entire WeBill platform. One-click outsourcing of field instructions to contractors, one-click contractor feedback to utility companies.

The Field Manager offers you unparalleled control over your workforce no matter where they are.
